Allowable Subject Matter

1. Claims 1-7 are allowed.

After consideration of the arguments presented in the Brief of 10/12/07, the Examiner notes that the art of record fails to anticipate or make obvious the limitations of “...assembling the compressed video bitstream by appropriately combining data for: at least a single copy of the stored I frame; at least one null frame; and various headers required for decodability of the compressed video bitstream; whereby decoding of the compressed video bitstream produces frames of video which produce images that do not appear to pulse visually...” as in independent claim 1. Dependent claims 2-7 are allowed for the reasons concerning the independent claim.

Conclusion
